OBSERVATIONS, COMMENTS AND NOTES

12 Point

Digital footprints are not so intense however it is available. Review answers! Some of the things you share on the Internet bring risks to your safety. Even though the scarcity of your digital footprint is low risk, you should still be very careful while receiving e mail or sharing some special things.

13 -16 Point

Digital footprints are so intense!! You should immediately review your sharing and profiles. You should be more sensitive about protecting yourself on the internet. Look at your answers again. Which behaviors that increase the digital footprint on the internet? What do you think you should do?

17 – 24 Point

Digital media is full of your footprints. What do you share on the Internet? Now think about the it's answer and evaluate the status of your profiles. You're not late yet. You should make some decisions and apply them for after that. From the moment you go online, you have to behave safely and you should stay away from behaviors that will harm your reputation. DON'T FORGET, digital footprint indelible. Make yourself a list and write "rules you should obey while you are online" on it. Hang this list where you can see it on the computer and control your digital footprint.

When I ask to students to give points to their digital footprints, they give less than 15. After implementing the survey about digital footprint, they realize that they have more footprints than they thought!

DIGITAL FOOTPRINT TEST

1. Do you use internet every day?
 - a. Yes
 - b. No
2. How many hours are you online?
 - a. More than 2 hours
 - b. Less than 2 hours
